Larkfield Warranty and Returns Policy (fictional sample content)

Limited warranty
The LF-200 gateway is covered for 24 months from the date of purchase against defects in materials and workmanship. The power adapter and patch lead are covered for 12 months. Keep your proof of purchase, because a claim cannot be processed without it.

What the warranty does not cover
The warranty does not cover damage from lightning or power surges, liquid damage, opened or altered units, or normal wear to the case. Replacing firmware with software not supplied by Larkfield also ends the warranty.

Returning a product you changed your mind about

You may return an unused product within 30 days of delivery for a full refund. It must be in the original packaging with all accessories. You pay the postage for this kind of return. Refunds are issued to the original payment method within 10 working days of receiving the item.

Faulty units

To claim for a faulty unit, request a return authorisation number, which has the format RMA-LF followed by six digits, for example RMA-LF204417. Write this number on the outside of the parcel. Larkfield pays the postage for approved faulty returns, and sends a replacement within 5 working days of receiving the faulty unit.

Replacement units

A replacement unit is covered for the rest of the original warranty, or for 90 days, whichever is longer. Before sending a unit back, save your settings with Download Settings and then perform a factory reset, because returned units are not guaranteed to be kept and any personal settings on them will be erased.

Contacting support

Support is available from 08:00 to 20:00, Monday to Saturday. Have your serial number ready, which begins with LFK and is printed on the label underneath the unit.
